

Sorting guide

How to prepare your 3D printing scrap so every gram earns points.

01

Sort by material

We accept PLA and PETG only. Want to recycle a different material? Email us first.

- Put each material in its own bag or container and label it PLA or PETG (print our material labels).
- Keep varieties apart too: PLA+, wood- or fiber-filled, glow-in-the-dark, silk, and so on each get their own bag.
- Failed prints, supports, brims, rafts, purge and leftover filament are all welcome.

02

Ship or drop off

Drop off for free at our Chesterfield facility, or buy a discounted shipping label at printeriodesigns.com/recycling (sign in so your points land in your account).

Tape the box insert label inside the lid. Ship to:

Printerior Recycling · 670 Goddard Ave, Chesterfield, MO 63005

03

Earn filament points

When your box arrives we weigh and inspect it, then add 280 points per kilogram to your account (1 point = 1¢). Spend points on up to 50% off each spool of filament.

F A Q

Can I send parts with post-processing?

Not if they have paint, glue or bed adhesive. If it washes off, clean it before shipping.

Should I sort by color?

Not required, but it helps.

Anything I shouldn't send?

No other plastics (ABS, PP, TPU, nylon), no hazardous waste, batteries, metal or sharps.

Do you accept empty spools?

Not at this time.

Is there a minimum weight?

No minimum.

Business, school, or print farm? Email us about organization programs.
